

Aylesbeare Platform

Overview

Our client was supplying a new inlet screen for South West Water which required a new access platform incorporating support steel work for the new screen and equipment.

Our client visited us at our workshop and offices to satisfy themselves that we could support them with their project. They were suitably impressed enough to award us with the steel work order.

Challenge

- 6-week duration from order instruction to completion.
- Incorporating client equipment within our design.

Results

- Delivered on time.
- Right first time.
- Repeat orders from client.
