

CASE STUDY

MARSHFIELD WRC

Overview

As part of an upgrade to Marshfield WRC near Chippenham, we were awarded the contract to design, manufacture and install a stainless-steel splitter tank with a galvanised mild steel support structure.

Challenge

- Completing design work from indicative drawings.
- Tank alignment with new M&E equipment.
- Structural supports avoiding clashes with client pipe work.
- Delivering within a tight deadline.

Solution

- Utilising our experience from similar projects to submit our proven design quickly and get ahead of program.
- Modelling in client M&E equipment to avoid potential clashes.

Results

- Delivered on time, right first time.
- No clashes with M&E equipment.
- Incorporated additional bracketry requested by client
